### **Abstract**

The use of a portable NMR device allows a non-invasive investigation of inorganic and organic materials.<sup>[1]</sup> The NMR investigation has been found mainly on relaxation measurements whose results seem compatible with different relaxation rates in different morphological domains. The use of a portable NMR device shows great potentiality because of its safe and simple *in situ* approach to Cultural Heritage documents.

During the talk, the underlying theory of this technique will be discussed and subsequently a broad range of applications will be presented.

## PERSONAL INFORMATION

Name: Priv. Doz. DI. Dr. Wolfgang Schoefberger  
Born: 8<sup>th</sup> January 1973  
Place of birth: Linz, Austria  
Nationality: Austria  
Status: Married, one Son (Vinzenz)  
Position: Senior Scientist  
Affiliation: Institute of Organic Chemistry,  
*Johannes Kepler University Linz*  
Address: Altenbergerstraße 69, 4040 Linz, Austria  
Telephone: +43-732-2468-8750  
Mobile-phone: +43-660-250-77-38  
Homepage: <http://www.jku.at/orc/content/>

## EDUCATION

**1987–1992:** High School Diploma for Chemistry and Technology in Wels (Austria) at the Höhere Bundeslehranstalt für chemische Betriebstechnik Wels.

**1992–1999:** Studying Chemistry and Technology at the University of Technology Graz, Austria, finishing the Studies with the Diploma Thesis: "*Synthesis and Morphology Investigations of Nanoseparated Block Copolymers*".

**2000-2002:** PhD Thesis in field of Polymer Chemistry (passed with distinction) at the Institute for Chemistry and Technology of Organic Materials under supervision of Prof. Dr. Franz Stelzer (Head of the Institute), Prof. Dr. Jörg Weber (Department of Organic Chemistry) and Prof. Dr. Christoph Marschner (Department of Inorganic Chemistry): "*Synthesis and chemical modification of conjugated polymers and copolymers and NMR investigations on the kinetics of the Ring Opening Metathesis Polymerization (ROMP) Reaction.*"

## PROFESSIONAL EXPERIENCE

**01/2003-6/2004:** Postdoctoral Studies at the Chemistry Department of New York University; Research cooperation with Prof. Dr. Alexej Jerschow (*Synthesis and Solid state NMR of inorganic metal complexes*).

**7/2004 – 01/2005:** Postdoctoral Research at the Department of Structure and Function of Proteins, Institute of Physical Biology, University of South Bohemia České Budějovice; Research cooperation with Prof. Dr. Rüdiger Ettrich (*Solid State NMR on biological samples*).

**02/2005-12/2005:** Postdoctoral Research at the Institute of Organic Chemistry; Research cooperation with *Univ. Prof. Dr. Norbert Müller (NMR Pulse Sequence Development)*.

**01/2006-04/2006:** Researcher at the Metropolitan Museum of Arts, New York City (Solid state NMR and Portable NMR Devices of arts materials).

**05/2006–11/2007:** Research Associate at the Institute of Organic Chemistry, Johannes Kepler University Linz (Development of non-metallated and metallated corrole/porphyrin compounds for molecular electronics, medical and catalysis applications).

**11/2007-11/2013:** Research Associate at the Institute of Inorganic Chemistry - Center for Nanobionics and Photochemical Sciences (CNPS), Johannes Kepler University Linz (Development of non-metallated and metallated corrole/porphyrin compounds for molecular electronics, medical and catalysis applications).

**8<sup>th</sup> March 2012:** *Habilitation for Organic Chemistry*, accepted at the Johannes Kepler University.

**2010-2013:** Vice-Chairman of the AG-NMR Working Party of the “Gesellschaft Östereichischer Chemiker”.

## PAST AND PRESENT RESEARCH GRANTS

- **Schrödinger Fellowship**, at New York University, financed by the Austrian Science Foundation (2003-2004), 35 k€.
- **Andrew W. Mellon Fellowship**, at the Metropolitan Museum of Arts (2005), 20 k€.
- **Standalone FWF-Project (P18384)**, “Solid state and liquid NMR of metal complexes”, 2006-2011, 320 k€
- **WTZ-Research Project (Austria-Czech Republic)**: Computer-Assisted Solid-State NMR Investigations of Polymorphic Systems, 9/2007-9/2009, 5 k€.
- **Research Project-EU-NMR** (Contract # RI13-026145) at the Center for Biomolecular Magnetic Resonance (BMRZ), Frankfurt, Germany, High field solution <sup>31</sup>P NMR experiments, 5 k€.
- **WTZ-Research Project (Austria-Croatia)**: Saturation Transfer Difference (STD) NMR Spectroscopic and CD-Spectroscopic Investigations of DNA and Human Serum Albumin (HSA)/Ligand Complexes, accepted 2011, 5 k€.
- **FFG-Project**: Prä-klinische Entwicklung einer Off-the-Shelf individualisierten Krebsimmuntherapie „In situ DC-CIT“, accepted in June 2012, 519 K€.
- **Standalone FWF-Project** “High-Valent Metal Tetrapyrrols for Surface-Supported Catalysis”, accepted by the Austrian Science Fund (FWF), August 2012, 670 k€.
